

**“Now more than ever, L.A. County needs leadership with the right priorities. We must move forward with reform that ensures accountability and equity for our criminal justice system.” – George Gascón**

**GEORGE’S VISION FOR CRIMINAL JUSTICE REFORM FOR L.A. COUNTY**

-  **Establish a criminal justice system based on accountability** by implementing stricter standards for when police can use force and enacting innovative reform measures that combat racial injustice, eliminate the use of the death penalty, and stop officer-involved killings.
-  **Strengthen public safety and expand victims’ rights** by making it easier for victims to report consumer fraud, physical abuse, or hate crimes, and partner with community organizations to bring a trauma-informed approach to serving victims in high-crime and violent neighborhoods.
-  **Use solutions to save money and allow for more investment in mental health and drug treatment**, and reduce the costs to taxpayers of over-incarceration by providing more opportunities for rehabilitation like education and job training so people can become productive members of our community.

**GEORGE’S RECORD OF FIGHTING FOR A FAIRER SYSTEM**

-  **George stood up for women** and cracked down on crimes like rape and sexual assault. As San Francisco District Attorney, he prosecuted more than double the national average of sexual assault cases and successfully fought to test every rape kit.
-  **George fought corruption.** He prosecuted public officials with ties to the mayor over illegal contributions and pay-to-play politics and held community college and public school employees accountable for misusing precious resources for students.
-  **George held police accountable.** He prosecuted over 30 police officers for excessive force and other misconduct, led an investigation into bias in the police department, and created the state’s first independent unit to investigate police misconduct.
